#### MONEY, BONDS AND STOCKS. A Spacemodically Active Market, with Mater-

ial Gains Throughout the List. NEW YORK, June 16 .- Money on Call was easy at I to I's per cent, the last loan being made at I per cent; closing flat.

Prime mercantile paper, 425 per cent. Sterling exchange was dull but steady at \$4.86% for eight-day bills, and \$4.88% for demand. The total sales of stocks to-day were 115,918 shares, including the following: Delaware & Lacks-

wanna Western, 4,600; Lake Shore, 7,245; Louisville & Nashville, 4,800; Missouri Pacific, 3,885, Northwesters, 5.497; Northern Pasific, preferred, 4.563 eding, 16,220; Richmond & West Point, 3,910; st. Paul, 21,400; Union Pacific, 9,650; Western

The stock market was quite active to-day, especially spots, and the tone of the dealings from start to sh was strong; material gains were made throughout the list, many stocks closing at the highest prices for the week. There was a dearth of news upon the street calculated to affect values either way, but the cagre advices from the West were of a reassuring ture, and the Grangers were prominent both for tivity and strength. It was announced that the coads regarded the new tariff in Iowa as a victory snabling them to maintain through rates and ocal rates in other States. The special feature of the lay, however, was New England, which was very trong, and the buying in the stock was attributed to interests closely identified with the property. A promnterests closely identified with the property. A prom-nent broker with a Boston house was conspicuous in the crowd dealing in the stock, bidding for large lots. The opening of the market was only fairly steady, with the professionals still in com-mand, and Missouri Pacific and New England were a lower. The bullish sentiment soon pre-valled, however, and London came in as a buyer; prices began to advance immediately, and the market became more solve on the increased demand for stocks. New England, Louisville & Nashville, Missouri Pacific and the Grangers took the lead, and values mounted rapidly during the first hour, but after that time the sales for realization kept the market down, though the advance met with no set-back. The was quiet and strong at the figures of the day. Everything on the list is higher this evening, and Chicago, on & Quiper ross 13, New England and Levisvil & Nasaville 14 per cent. each; North-western, 14; S. Pau, Rock Island and Lake Shore, 1 per cent. each, and the remainder fractional

The ra irond bond market was quiet, but it was factors ampuly with the declings in shares, and remained firm to strong throughout, though the chances in quotations were not so pronounced as in the sha elfar. No special feature marked the trad-ing, and the sales were only \$ 23,000. Sate boads were featureless. Closing quo'ations

In produce, eggs and choice butter rule, firm, with receipts hardly up to the usual volume. The continued light supply of eggs leads to the belief that in the early spring farmers, being hard up, have sold a larger per cent of their poultry than usual for "pinmoney." Receipts of poultry, as well, are lighter than at the corresponding period last year, but the demand has not been so great; therefore, the lighter supply has not been as noticeable as with eggs, which have been in good demand for shipping and local consumption. Early vegetables continue in light supply, while the demand is good, consequently high prices continue to rule. Early apples and peaches are coming on the market quite freely and a lower range of prices may be looked for the coming week. Had it been any day but Saturday the maket would have broken to-day. New potatoes are in abundant supply and seiling a dollar a barrei lower than in June, 1887. Old potatoes are in little request and but few are held in stock here. There was a fair supply of strawberries to-day, and prices ruled steady, but it is expected that higher prices will rule next week as the dry weather is entting down the growth. Dry goods men are having only a fair trade, mostly in the way of replenishing broken stocks. The provision men are doing something in a jobbing way, prices ruling steady. They are all carrying a larger quantity of hog products than at the corresponding time last year. The wool market is dull and prices rule weak. The millers who are the best off, says one of their number, are those who are taking advantage of the dull time to improve their mills. But little improvement is looked for until after harvest.

The week closing to-day has been the dullest in many years with the grain men. Buyers are few and indifferent. Wheat to-day went off 5 cents, and no one seemed to want any at that figure. Corn ranged some lower, but the market did not break as bad as did wheat. Quiet times are looked for for several days to some. Track bids to-day ruled as follows: Wheat-No. 2 red..... QUEEN VICTORIA has had another disagreement with her con-in-law, Prince Henry of Battenberg. The royal mother-in-law recently overheard Henry make certain disparaging remarks concerning Scotland and the Scotch. Her Majesty was much annoyed. Theebaw was permitted to take away with him a few valuable articles, but the larger part of his fortune was seized by the English. Eighteen Tears of Terrible Suffering Graphically Described.

There are few railroad men in this section who do not know William Linderman, the engineer. They, as well as many who are not railroaders, will be interested to learn that which he describes in the following. Speaking to the writer, who called upon him at his house, at 172 Blake

street, he said: "For eighteen years, as my friends know, I had been a sufferer. Not in the sense of some, who imagine themselves sufferers, either. I was for all that time, and I don't know but longer, a sufferer, and so intense was my suffering that I sometimes almost wished that death would come and put an end to it.

"With my bead and throat-catarrhal and bronchial trouble I think they called it-it began years before the time I have described. "But for the last eighteen years," and here

"These pains in my head were something im-possible to describe. Sometimes it would seem as if some one was working with saws and hammers trying to take the top of my head off. They never left me day or night. Sometimes they would be worse than others, but I was nevor free from them.

"Well, I placed myself under his care. And the result? The result is that now I am entirely free from the pains and suffering I underwent for eighteen years. The result of Dr. Blair's treatment was simply this: It cared me. I have no pains anywhere. My head and throat are all right now. I have gained back my lost weight, and I am a well man; as well as anyone As stated, Mr. Linderman is a well-known

engineer. He resides at 172 Blake street. In Simple Form. AN EASY EXPLANATION OF MATTER USUALLY

VEILED IN TECHNICALITIES. In this connection there can hardly be a more interesting subject than the ultimate effect of catarrh upon the hearing. The process of this disease is poisoning the breath, rotting away the delicate machinery of smell and taste, poisoning the lungs and blood and passing into the stomach, enfeebling the digestion, vitiating the secretions and polluting the very fountains of life, all this has perhaps been very generally discussed; but the very frequent effect of catarrh of the nose and throat upon the hearing has not been touched upon as often as the sub-

ect Warrants. A very little study of anatomy, will show the reader that the junction of the back passage of the nose and the upper parts of the throat is connected with the ear by a minute and delicate passage known as the Eustachian tube. Along this tube the catarrhal process extends. oraducing congestion and inflammation. By the further extension of this process to the mucous lining of the tympanum of the ear is caused in some cases slight forms of catarrh in the middle ear, and in this way partial or complete deafness is produced.

Partial or complete deafness may in like manner result from the swollen, thickened tissue encroaching upon the mouth of the Eustachian

Partial or complete deafness may result from catarrhal interference with the nasal breathing depriving the ear of a proper supply of pure air, or from the effects of obstruction in the nassl passages, causing undue rarification or condensation of the air in the middle ear.

In such cases as these general remedies, which are often prescribed, prove comparatively ineffective. A cure can only be obtained by skillful and scientific local treatment—and let it be said here that nothing could be attended with more disastrous results than unskillful local treatment-combined with constitutional treatment and care for the disease which brought about the trouble to the hearing.

When writing for treatment by mail under Dr. Blair, Mr. George W. Keene, of the Western Union Telegraph Office, at Middletown, O., described his case briefly and pointedly as follows: "My symptoms are pains above and be-low the eyes, beadache, discharge from head and throat, especially in the morning and even-ing, cough, pains in the chest, side and back." Writing later, Mr. Keene said of his improvement under the treatment: "I am in fine condition now. My head feels very well. Cough and pains passed away, and I am in first-class condition. Cheese quiet CHICAGO, June 16.—When business opened on Change to day it was quite evident that the spirit of quidestion was general. There were a few exceptions and a few bold takers of cereals, but this only served or slight rallies and checked the downward tendency.

By noon the conservative feeling of the morning gave may to a renewal of vigorous liquidation. Large quantities of "long" wheat came out, and July, which opened uschaoged at 82 ge, after selling down to 150 early, and returning to 82c, or about the closing price last night, took a second plungs and went to 80 ge, wate a slight rally to 81 ge. As against the spirit of realizing and liquidation, there was little to encourage buying. Clearances were small. There was some buying by exporters for the continent, but selling by British agents. The masher and crop news grows more bearish every day. The sutable estimate does not put the visible supply decrease at over 1,000,000 bu. July closed at 81 ge.

Dera was quite active to-day and at times considerably masted, with transactious heavy and at a lower range Dera was quite active to-day and at times considerably maked, with transactions heavy and at a lower range of prices. The "bears" were particularly favored by the circumstances. The shipments yesterday were light. The weather was the best possible for the growing copy. Wheat was panicky, the estimated remains for Meady were large, and it was figured that load seads had increased fully 1,000,000 bu during the west. plunge downward. July opened at 51%, and brought up shortly after noon at 50%. Here there was enough buying to prevent a further slump. Hutchinson was a free buyer from 51% for July down to the bottom. July closed at 50%. Oats suffered a decline under the combined influence of good weather, fine crop prospects, and the marked weakness in other grains. There was no very large trade, but the market was heavy and sagging, with but little recovery to the close. July oats fell from 33% to 32% and closed with 32% bid. Provisions were rather slow and weakened early, in sympathy with wheat and corn, but later became stronger and rallied, but last sales were at practically the same prices as yesterday. Scalpers were the principal traders, but were not all aggressive. July pork sold at \$13.60% 13.70 and closed at \$13.67%. July lard at 8.47% 88.52%, and closed at 8.47% 88.50c. July short ribs sold at 7.47% 27.50c. Packing since March 1, 915.000 hogs, against 957,000 same time last year. The leading futures ranged as follows:
